WORK EXPERIENCE

Software Engineer
Libsys Ltd

07/2018 – Present   *Gurugram, India*

PROJECTS

LsNetX(SaaS based e-commerce Platform) (07/2018 – Present)
- Worked to develop point of sale module to help automate the sales operations of stores.
- Created many Modules from scratch(such as Store Products Module,Dynamic Bill Template Generation For Stores,Cash Management Module,Reports Module, Sales Ledger Module etc) for Point Of Sale.
- Migrated a number of templates of LsnetX to angular.
- Implemented various front-end requirements for major vendors like bamboo greens.
- Developed a Mobile Responsive Website for LsnetX to increase the customer base for the product .

Assignment Real Time Review(SPA for Sharing and Collaborating on Documents in Real Time) (04/2019 – 07/2019)
- Worked to develop an SPA from scratch through which the student of a classroom can share and collaborate on the assignment solutions,reports with its faculty in real time.
- Worked out the architecture of the project.
- The functionality of Document permissions(like Comment and View and Edit only) before sharing is implemented.
- A Node Server is developed to carry out the communication between the student and faculty.
- Integrated it with the LSA Classroom project.

LSA Classroom (05/2019 – 06/2019)
- Developed a Blog Module in which student and faculty can create and share Blogs with each other .
- ID generation for Student and Faculty is implemented for the setting module.
